

ABIGAE K. KIRIMI

IT Support Specialist | Software Developer

Nairobi, Kenya | +254 741 232 939 | kirimiabigael@gmail.com

PROFESSIONAL SUMMARY

Results-driven IT Support Specialist with hands-on experience in helpdesk support, systems administration, network troubleshooting, and ICT security operations. Proven ability to provide first-line technical support to end-users, configure and deploy workstations, monitor LAN/WAN infrastructure, manage user accounts and access permissions, and maintain ICT documentation in compliance with organisational standards. Skilled at escalating unresolved incidents, enforcing security policies, and delivering reliable, user-centred ICT services under pressure. Seeking to grow within a structured ICT graduate trainee programme.

CORE COMPETENCIES

Helpdesk & User Support, First-Line/Level 1 Technical Support, Hardware & Software Troubleshooting, Network Troubleshooting & Maintenance, Systems Administration, ICT Security Operations, User Account & Access Management, Incident Escalation & Documentation, IT Asset Management, Data Backup & Recovery, SLA Compliance, ICT Project Support, Knowledge Base Development, Customer Service

TECHNICAL SKILLS

- Operating Systems: Windows 10/11, Windows Server, Unix/Linux (Ubuntu)
- Networking: LAN/WAN Diagnostics, TCP/IP, Wi-Fi Configuration, Network Monitoring, Cisco Routing & Switching (Conceptual)

- Security: Threat Monitoring, Security Policy Enforcement, Audit Support, Compliance
- Development: .NET, PHP, Python, SQL, HTML/CSS, REST APIs
- Soft Skills: Communication, Teamwork, Attention to Detail, Adaptability, Client Relations

PROFESSIONAL EXPERIENCE

Technical Support Attachee | The Nairobi Hospital

July 2025 – August 2025

- Provided first-line technical support for 4+ ICT incidents daily involving computers, printers, and medical equipment, maintaining 95%+ system uptime for critical hospital operations.
- Delivered helpdesk assistance to staff on standard software and hardware issues; escalated unresolved incidents with clear documentation to senior ICT staff.
- Monitored LAN/WAN connectivity and performed routine infrastructure checks, proactively identifying and resolving network stability issues.
- Configured and deployed hospital-approved applications and peripherals (scanners, monitors, projectors) in compliance with organisational IT policies.
- Provided ICT support during hospital meetings, events, and field activities.
- Performed weekly data protection procedures and system backups, safeguarding critical patient and operational data.
- Delivered end-user training on standard software tools, reducing repeat service call-outs by an estimated 20%.

Technical Support Intern | Suetech Business Systems Ltd

May 2024 – August 2024

- Handled 20+ hardware and software incidents per week as primary first-line support, consistently meeting SLA targets with a sub-60-second average first-response time.
- Configured and deployed 15+ workstations and peripheral devices, streamlining employee onboarding and reducing per-unit setup time.
- Escalated unresolved ICT incidents to senior team members with structured documentation, ensuring timely resolution within agreed timeframes.
- Implemented software updates and security patches across multiple systems, maintaining up-to-date security posture and compliance.
- Maintained accurate IT asset inventory and support documentation, improving equipment tracking accuracy and knowledge-base accessibility.

EDUCATION

BSc Computer Science | Catholic University of Eastern Africa (CUEA), Nairobi

Expected 2026

Relevant coursework: Networking & Data Communications, Systems Administration, Database Management, Software Engineering, IT Security Fundamentals, Operating Systems.

Kenya Certificate of Secondary Education (KCSE) | The Kenya High School

2022

KEY ACHIEVEMENTS

- Maintained a sub-60-second average first-response time for IT support tickets at Suetech Business Systems Ltd, exceeding industry helpdesk benchmarks.
- Single-handedly deployed 15+ workstations within intern tenure, accelerating team onboarding and reducing setup time.
- Supported uninterrupted hospital ICT operations at The Nairobi Hospital, handling medical-grade equipment in a high-stakes environment.
- Proactively reduced repeat support incidents through targeted end-user training, demonstrating commitment to sustainable ICT service delivery.
